

= exact

And it all comes together.

“Who is Exact?”

We are a very successful European based software company with over 100,000 customers worldwide, annual revenue of approx. \$300 Million and 0 debt on our balance sheet. As with most European based software organizations, we entered the US market through acquisitions in early 2002 and allowed those companies to run autonomously for a number of years.

You knew these companies as **Macola**, **JobBoss** and **Micro-MRP**. We planned on introducing **Synergy** and our flagship ERP product **Globe** a couple of years ago, but the recent economy created an un-anticipated delay.

We are now going forward with our plans in the US market. As you can see for yourself, Synergy represents a new class of software designed to unite people, through collaboration and structure that will drive results throughout an Enterprise. We are very excited about the potential that Synergy and Globe have to offer a wide variety of organizations. As we position Synergy and Globe to more organizations to solve current business issues, like we can at your company, I'm sure you will agree that Exact will be a well-known entity in a few short years in the US.”
